Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 March 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 and 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Engelke et al.

Engelke et al. shows a system for uniformly dispensing a fluid substance comprising at least one multi-port manifold 90 having an inlet and at least two exit ports disposed substantially radially of the inlet and having a planar surface disposed in one end of the inlet proximate the exit ports (see Figure 3), a reservoir 60 in fluid communication with the inlet, delivery conduits 188 each in fluid communication with one of the exit ports wherein the fluidic substance flowing into the inlet under pressure impinges the planar surface and is radially dispersed as recited wherein the fluidic substance is an agrichemical and wherein the system has two multi-port manifolds in series as recited in claims 2 and 3 respectively. The pressure is provided by a pump 50 which pressurizes the reservoir 60 as recited in claims 4 and 5.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3752

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8, 9, and 13-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Engelke et al.

The exit port diameters with respect to the fluid inlet would have been a matter of design choice since such a modification would have involved a mere change in the size of an object which is generally recognized as being within the level of ordinary skill in the art when there is no apparent significance in such a modification. The device of Engelke et al. is capable of carrying out the methods of claims 15-19. Regarding claim 20, it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art.

Allowable Subject Matter

5. Claims 24-26 are allowed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Clark et al., Bolton, and Bailey are pertinent to Applicant's invention.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis D. Hwu whose telephone number is 571-272-4904. The examiner can normally be reached on 8:00-4:30. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherbel can be reached on 571-272-4919.
